5. Create a HTML page to display a new image and text when the mouse comes over the existing content in the page using JavaScript Event Handling.

```html
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>MCA Hover Example</title>
  <style>
    body {
      text-align: center;
      padding: 50px;
    }
    #content {
      display: inline-block;
      cursor: pointer;
    }
    img {
      width: 300px;
      height: 300px;
    }
  </style>
</head>
<body>

  <div id="content" onmouseover="changeContent()" onmouseout="resetContent()">
    <img id="image" src="https://via.placeholder.com/300" alt="Placeholder Image">
    <p id="text">Hover over me for MCA content!</p>
  </div>

  <script>
    function changeContent() {
      document.getElementById('image').src = 'mca.jpg'; // Replace with your actual MCA image path
      document.getElementById('text').textContent = 'Master of Computer Applications (MCA)
```

```
Content!';
    }

    function resetContent() {
        document.getElementById('image').src = 'https://via.placeholder.com/300';
        document.getElementById('text').textContent = 'Hover over me for MCA content!';
    }
  </script>

</body>
</html>
```
